ABOUT CHCD

Vision

A global phenomenon in which human and community development are stakeholders-driven.

Mission

We are a team poised to inspire, initiate and facilitate human and community development driven by stakeholders through research, advocacy, capacity building, trainings and mobilizations.

OUR IDENTITY

Centre for Human and Community Development is a Christian and missional charity with a commitment to strategic people, social and geographical community engagement with holistic development that engenders transformation of indigenous people of any country of engagement through intentional facilitation of sustainable interventions within human spheres, addressing social needs, human capital deficits and facilitating healthy relationships.

We promote gospel breakthrough through Community Development and Discipleship Initiative also known as Community Driven Development Initiative (CDDI/SGM; Saturation Gospel Movement). The access gained to people and communities through healthy relationship development are our roadmaps to exponential disciple making especially among the unchurched people and communities.

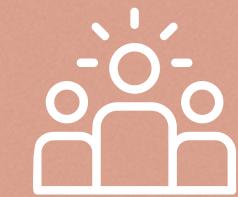

OUR CORE OBJECTIVES

The gospel for every person

Disciple-making community for every people and place

Christ-like leaders for every faith community and sector

Kingdom impact in every sphere of society Work History

**We achieve
these through**

Mobilization

Prayer Network

Strategic Partnership

Professional Networking

**Focused Training and Capacity
building**

OUR HISTORY

In the year 2014 and 2015 our Team East Africa (TEA-CHCD) was in five Counties in Kenya and a county in Uganda for research and engagement. Nairobi, Kakamega, Busia, Narok, Mombasa of Kenya and Busia Uganda counties were the province of engagement respectively. About thirty local leaders were engaged in Mumias of Kakamega County and taught on how to facilitate engagement, development and social transformation through saturation gospel breakthrough that turns various opportunities which seemingly was categorized as social challenge and gaps. In Sininga of Busia-Kenya County about fifteen widows and widower were engaged and empowered through cropping and animal husbandry (Pig rearing), fifteen community leaders were engaged in Port-Victoria (a district under Busia County), while twenty were engaged in Busia city of Busia County of Western Kenya to take responsibility for the sustainable development of their communities which became an in-road to building self-propagating faith communities.

Though our community engagement and development work started in Nigeria in the year 2015. Through research, we discovered that the socio-economic problems, poverty and illiteracy, high mortality rate and how they affect family and community life, as well as the environmental sustenance in spite of the several assets, human and economic capital untapped among the Jarawa people of Jos East Local Government, Plateau State, Nigeria.

The 165 villages in the Local Government were engaged to inspire and few individuals were empowered to facilitate saturation gospel breakthrough through healthy relationship development, influential faith, capacity building and trainings. This is to help envision a desired-future for communities and to maximize human and community assets towards people and community well-being.

Our engagement has outgrown East and West Africa, even though our initial focus was the Northern Region of every country in Africa especially 774 Local Governments in Nigeria which are least evangelized, unchurched communities and unreached people groups (tribes with less than 2% followers of Jesus) across Africa.
